

# Fact Sheet

## Company Profile

Human health is at the core of RAUMEDIC Group's business. The company specializes in processing medical-grade thermoplastic polymers and silicones at five production sites in Germany and the United States.

As a partner of the international medical technology and pharmaceutical industry, the polymer specialist develops and produces customized components for customers, including tubing, catheters and molded parts as well as complex groups of components and systems for diagnostic and therapeutic uses. For the clinical areas of neuro-monitoring and traumatology, RAUMEDIC produces high-precision pressure-measuring systems with microchip technology. In doing so, it plays a key role in safe patient care around the world.

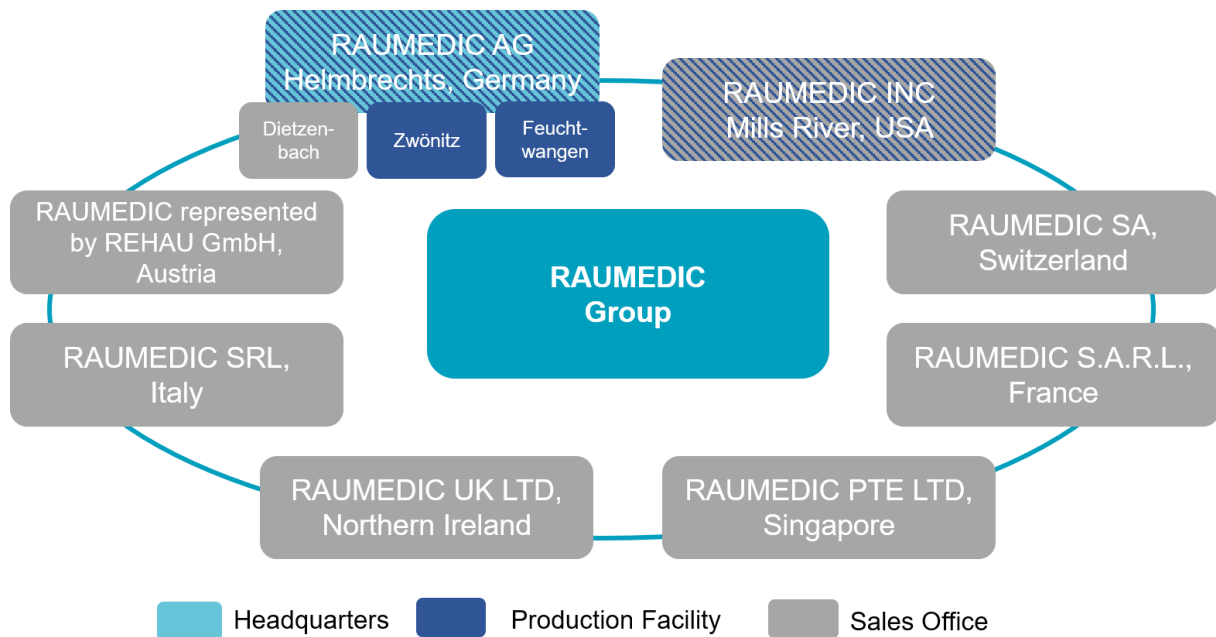

With 70 years of experience in the areas of extrusion, injection molding and assembly, the company with a global workforce of 800 people turns customer ideas into mature products. The foundation of this work is formed by a quality management system based on ISO 13485 and clean room manufacturing on an area of 107,000 square feet (10,000 square meters) based on ISO 14644 (class 7).

Its global sales network and its own distribution companies in core markets ensure that medical and pharmaceutical customers as well as end users in hospitals and doctors' offices have a high level of product availability at all times.

## Important Milestones

- 1948 Founding of today's sister company REHAU AG + Co.
- 1957 First German heart surgery with RAUMEDIC tubing
- 1971 Official registration of the brand name "RAUMEDIC"
- 1978 First automation in the field of injection molding
- 1996 Entry into microchip technology
- 2004 Spin-off of RAUMEDIC as a new company with 240 employees
- 2014 Expansion of production and office areas at the headquarters in Helmbrechts
- 2015 Construction of new development and production facilities in the USA
- 2016 Start of production in Mills River, North Carolina, USA
- 2018 Construction of a modern customer center at the German headquarters

Chairman of the Board of Directors

## Production Information

### Production methods

#### Extrusion

- Single-lumen tubing
- Double and multi tubing
- Multi-layer tubing
- Micro tubing
- Multi-lumen tubing
- Silicone tubing
- ECC tubing
- Lay-flat tubing
- Thin-walled tubing
- High-pressure tubing
- Gas-supply tubing
- Wire coating and wire inlay
- Heat exchange mat

#### Molding

- Thermoplastic injection molding
- Silicone injection molding
- Micro molding
- Multi-component injection molding
- Overmolding and insert molding

#### Assembly

- Assembly technology
- Punching
- Printing
- Tip- and thermoforming
- Integration of electronic components
- Packaging, sterilization and certification

### Material expertise

- Thermoplastics and silicone
- Customer-specific PVC formulations
- In-house compounding

### Annual production output

- 650,000 kilometers of extruded tubing
- More than 100 million molded parts

### Further Competencies

- Research
- Material selection
- Product conception
- Design & Construction
- Prototyping
- Supporting compliance with regulatory requirements

From left to right: Extruded multi-lumen micro tubing, small dimensioned molded parts and complex assemblies by RAUMEDIC are used in the medical technology and pharmaceutical sectors.

## Facts and Figures

**Turnover (in millions of euros)**

**Staff Development**
