| 10:00  | **Welcome**  
(RAUMEDIC, S. Bele)                                                   |
| 10:15  | **The PTO measurement system – an introduction**  
(RAUMEDIC)                                                       |
| 10:45  | **Different forms of tissue hypoxia – what can we really measure?**  
(S. Bele)                                                        |
| 11:35  | **Coffee break**                                                       |
| 11:55  | **P_{O_2} in patients with subarachnoid hemorrhage**  
(S. Wolf)                                                     |
| 12:35  | **P_{O_2} measurement – does it correlate with autoregulation after SAH**  
(T. Westermaier)                                           |
| 13:05  | **Lunch break**                                                        |
| 14:00  | **P_{O_2} measurement – in TBI - a necessity following the BOOST II trial?**  
(S. Bele)                                               |
| 14:30  | **Multimodal monitoring in patients with TBI – tricks and pitfalls**  
(S. Wolf)                                                   |
| 15:15  | **Multimodal monitoring in the ICU: Is it really helpful? – case examples**  
(J. Rossmann)                                              |
| 15:45  | **Multimodal monitoring – experiences in a large Neuro-ICU Hamburg**  
(P. Czorlich)                                             |
| 16:15  | **Coffee break**                                                       |
| 17:05  | **The use of direct brain tissue oxygenation monitoring for indirect revascularisation procedures in Moya-Moya patients**  
(R. O’Kane)                                               |
| 17:40  | **Monitoring in the ICU – new perspectives**  
(T. Westermaier)                                             |
| 18:05  | **Discussion panel**                                                   |
| 18:30  | **Farewell, hands on time**                                            |
| 19:30  | **Get together (incl. dinner)**                                         |
